Professional Certificate in

AI and Machine Learning

(AIML)

Duration: 180 Hours

Objective:

AI and Machine Learning teaches the student core concepts of Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, and Natural Language Processing, focusing on Python programming, Large Language Models (LLMs), Transformer architectures, Prompt Engineering, and full-stack AI application deployment.

What You'll Master

Core AI:

Gain a comprehensive understanding of AI, Machine Learning, Deep Learning, Computer Vision, and Natural Language Processing.

Practical Proficiency:

Develop high proficiency in Python programming for AI using industry-standard modern frameworks and cloud platforms.

Next-Gen Tech Skills:

Master Large Language Models (LLMs) and Transformer architectures with modern Hugging Face ecosystem tools.

Application & Ethics:

Learn practical Prompt Engineering, Full-Stack AI application deployment and responsible AI ethics.

Course Outline

Module I:

AI & ML Fundamentals

Introduction to AI & Python Programming, Supervised/Unsupervised Learning Machine Learning Applications, Intro to Deep Learning

Module II:

DL, CV & NLP

Deep Learning & Neural Networks, Computer Vision (OpenCV, YOLO), Natural Language Processing & LLMs (Transformers, Hugging Face)

Module III:

GenAI & Integration

Deep Learning & Neural Networks, Computer Vision (OpenCV, YOLO), Natural Language Processing & LLMs (Transformers, Hugging Face)
Comprehensive Practical Training & Capstone Projects

Career Path

AI/ML Engineer:

Data Scientist:

NLP / Vision Engineer:

AI App Developer:

Exit Profile

Machine Learning

Deep Learning

Natural Language Processing

Computer Vision

Python AI Stack
