

Professional Certificate in GENERATIVE AI, FOUNDATION MODELS & FMOPS

Duration: 2 Months / 360 Hours

This 6-month program is designed for graduates and career switchers aiming to enter the AI job market. The curriculum offers a balanced combination of theory, hands-on labs, and capstone projects, structured within a manageable 15-hour per week commitment. Participants will develop a FutureX-hosted portfolio of AI projects while gaining practical experience in Generative AI, Machine Learning & Deep Learning, AI Agents, Foundation Model Customization, and FMOPs. The program also prepares learners for the AWS AI Practitioner Certification, equipping them with the skills and credentials needed to confidently pursue careers in the AI industry.

- » AI & ML Fundamentals
- » Building AI Applications with AWS
- » Common GenAI Patterns
- » Model Customization & Evaluation
- » Bringing AI to Production
- » Responsible AI, Security & Governance
- » Exam Preparation & Mock Tests
